DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 78-96 and 108-142, drawn to an embossing apparatus, classified in class 101, subclass 23.
 - II. Claims 97-107, drawn to a system for positioning an embossing roll, classified in class 101, subclass 376.
 - III. Claims 143-147, drawn to an embossing roll positioning apparatus, classified in class 101, subclass 376.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being used to position an offset printing sleeve onto a cylinder core using pressurized air. Invention III also has separate utility such as being used to position sleeves onto impression cylinders, transfer cylinders, press cylinders, etc. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different search, restriction for examination purposes as indicated is proper.

Art Unit: 2854

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
